Thank You

To Whom It May Concern:

I would like to thank Zita Kalandarishvili for volunteering her time to support our family and our three-year-old child. Zita worked with us to understand our child's needs and developed an occupational therapy home program with activities and strategies that we could incorporate into our daily routines.

She took the time to explain the activities to us and provided practical ideas that we could continue using at home. We appreciated her patience, support, and the care she showed while working with our family.

We are very grateful for the time and effort Zita volunteered to help our child and family. Her support was meaningful to us, and we truly appreciate everything she did.
